GitHub: github.com/KrishTaliyan
Mobile: +91 8273260384

SKILLS

Languages: Python, C, C++, Java, JavaScript
Frontend: HTML, CSS, Tailwind CSS, React, Next.js
Backend: Node.js, Express.js, REST APIs, Authentication (JWT)
Database: MongoDB, MySQL
Tools/Platforms: GitHub, VS Code, Linux/Ubuntu, Postman, XAMPP
Soft Skills: Teamwork, Problem-Solving, Time Management, Leadership

PROJECTS

NearBite - Food Delivery Platform | *MERN Stack (MongoDB, Express.js, React, Node.js)* *Jan' 26*

- Engineered a food delivery platform enabling users to discover nearby vendors, manage cart operations and, complete seamless checkout workflows across an integrated MERN stack system.
- Secured application route and APIs using JWT-based authentication with role-based access (User/Restaurant), ensuring controlled data flow and scalable backend architecture.
- Delivered responsive React + Tailwind interface with optimized API communication via Axios, enhancing user interaction across menu browsing, cart updates, and order processing.

Startup-to-Corporate Connect | *MERN Stack (MongoDB, Express.js, React, Node.js)* Nov' 25

- Developed a full-stack platform enabling startups and corporates to connect, collaborate, and explore partnership opportunities through structured profiles and role-based dashboards.
- Implemented secure authentication and authorization using JWT with middleware-based role access control, ensuring protected API communication and data security.
- Designed a responsive React + Tailwind interface and integrated Axios for seamless frontend–backend communication, improving usability and interaction flow across the platform.

Notepad Application | *MERN Stack (MongoDB, Express.js, React, Node.js)* Jul' 25

- Programmed and optimized CRUD operations for note management using MongoDB and Express.js, ensuring 90% reliability and reducing API response time by 35% through efficient design and query handling.
- Deployed a responsive and intuitive UI in React, enabling seamless note creation, editing, and deletion; improved user task completion speed by 40% due to clean component design.
- Implemented secure backend integration with Node.js and deployed the full-stack app, resulting in stable performance, smooth synchronization, and a user satisfaction score of 90%.

TRAINING

Cipher Schools (Edtech Company) | MERN Stack Development

- Expanded full-stack applications using MongoDB, Express.js, React, and Node.js, strengthening backend–frontend integration and accelerating feature delivery by 30%.
- Implemented CRUD operation, REST APIs, and component-based UI development to enhance the application scalability and improve response efficiency by 25%.
- Gained hands-on experience in authentication, routing, and state management, resulting a 35% significant improvement in overall project functionality and practical implementation skills.

CERTIFICATES

Git and Github | CipherSchools Jul' 25
Software Development | Coursera Apr' 24

ACHIEVEMENT

Solved 300+ coding problems across data structures and algorithms. |LeetCode *Nov'25*

Achieved 5-star (Gold) rating in Java on HackerRank. | HackerRank Aug'25

EDUCATION

Lovely Professional University Phagwara, Punjab
Bachelor of Technology Aug' 23 – Present
Computer Science and Engineering; CGPA: 7.88

J.P International School Meerut, UttarPradesh
Intermediate PCM; Mar' 21 – May' 22
Percentage: 91%
